

# Why AuditAble + Microsoft Purview Beats Legacy GRC for Regulated Teams

**Stop wrestling with legacy Governance, Risk, Compliance (GRC).** AuditAble + Microsoft Purview makes compliance operational, not ornamental.

## The Problem with Legacy GRC

Legacy Governance, Risk, and Compliance (GRC) platforms have long been the default for regulated teams. But let's be honest: using these tools often feels like a never-ending swivel-chair exercise.

- Manual control mapping
- Chasing evidence across disconnected silos
- Endless spreadsheets just to satisfy auditors

That's ornamental compliance—looking good on paper, not being truly audit-ready.

## AuditAble Flips the Paradigm

AuditAble integrates directly with **Microsoft Purview Compliance Manager**, harnessing its native compliance intelligence and layering in structured enablement for genuine audit readiness. Here's how:

- **Native Microsoft Signals**  
Compliance isn't static. Purview Compliance Manager pulls real-time posture data from Microsoft 365, Azure, and more, automatically updating assessments as your environment changes.
  - **Benefit:** No manual refreshes, no uncertainty—your team works from the latest signals, reducing risk and eliminating surprises.
- **Improvement Actions, Not Guesswork**  
Legacy GRC surfaces vague “control gaps.” AuditAble translates gaps into **actionable tasks** with:
  - Step-by-step guidance
  - Assignable owners
  - Automated testing where possible

Your team knows exactly what to do next—compliance improvements become intentional and measurable.

- **Compliance Score for Prioritization**

Say goodbye to static spreadsheets. AuditAble surfaces a **dynamic compliance score** that reflects your current posture and highlights what matters most—so remediation is strategic, not reactive.

- **Evidence Vault + Auditor Packet**

Preparing for audits shouldn't drain resources. AuditAble organizes all compliance proof in a **forwardable format**, so auditors see exactly what they need—without endless back-and-forth.

- **Faster, Leaner, Smarter Compliance**

No manual mapping. No duplicate data entry. No bolt-on connectors.  
AuditAble + Microsoft Purview = Microsoft-native compliance automation  
+ AuditAble's technical rigor—streamlining everything from daily control management to annual audits.

## Ready to Accelerate Compliance?
